Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's representative initiated a telephonic interview with the Examiner to discuss why the after final amendment of record in paper #8 filed on July 22, 2002 was not entered. Claim 7 in the last entered amendment, paper #6 filed on March 26, 2002, merely recites that the cardboard sheets have "the contact points of the channels of the adjacent sheets glued together." The newly amended claim 7 in the unentered after final amendment now recites "with the channel crest of adjacent sheets being in contact with each other at spaced point therealong". The new limitation clearly further limits and clarifies what Applicant desires the claimed contact points to be. The limitation in claim 7 of record in paper #6, "the contact points of the channels of the adjacent sheets glued together," is broader than the proposed amendment in the unentered after final amendment. The limitation does not specify that the contact point can only be at the channel crests of the adjacent sheets and is broad enough to read on spacers between the sheets. The unentered amendments in the after final amendment of record in paper #8 filed on July 22, 2002 would be entered upon filing of an RCE or CPA.
